

SeaCal is an advanced form of Calcium and Magnesium.
The nutrients are reacted with an organic acid for superior foliar uptake.

Kelp is a rich source of natural nutrients, amino acids and plant sugars that increase root growth and tillering.

FEATURES & BENEFITS

HYBRID ORGANIC-MINERAL NUTRIENTS

- Organic acid increases foliar uptake of calcium and magnesium.
- Superior translocation of calcium & magnesium
- SeaCal has superior tank mixing properties.

KELP EXTRACTS

- Promotes root growth up to 20-30% over controls
- Promotes antioxidants for increased tolerance to stress.
- Up to 40% greater core mass under drought conditions.

SYNERGY

- Kelp extracts promote cell expansion and tillering.
- Ample supply of calcium is needed to keep pace with the rapid cell expansion and tillering.
- Magnesium magnifies chlorophyll product, resulting in more plant energy.

2% Calcium 2% Magnesium

Guaranteed Analysis

Calcium (Ca).....2.0%
Magnesium (Mg).....2.0%
Derived from: Calcium acetate and Magnesium acetate.

ALSO CONTAINS NON-PLANT FOOD
3.0% Kelp derived from *Ascophyllum nodosum*.

DIRECTIONS

<u>Turf Variety</u>	<u>per 1000 sq. ft.</u>	<u>Fairways per Acre</u>	<u>Frequency</u>
Cool & Warm Season Turf	3-6 oz.	1-2 gallons	7-21 days
